WORK EXPERIENCE

- **Full Stack Developer, CloudMotiv** Nov 2025 – Present
 - Developed an **AI-powered document intelligence platform** capable of analyzing **PDF documents** and automatically generating structured insights such as summaries, analytical notes, and report-style outputs.
 - Architected and implemented both **frontend** and **backend** infrastructure, building scalable document ingestion and processing pipelines for efficient information extraction.
 - Integrated **AWS authentication services** and deployment pipelines to ensure secure, scalable user access while optimizing **LLM-based workflows** to reduce operational costs.
 - Building an **AI-powered drone health monitoring system** with **predictive maintenance capabilities**, developing **machine learning models** for diagnosis, prognosis, and automated alert management with interactive dashboards for real-time fleet monitoring.
 - Built **StackIQ**, a **harness-level AI/SaaS utilization diagnostic** for **Claude (Cowork / Claude Code)**: a **5-stage, read-then-act pipeline** (4 read-only stages, 1 human-gated action stage) that finds idle seats, tier mismatches, duplicate tools, orphaned accounts, and shadow IT; sizes findings in **dollars, seats, or accounts**; and ships an **Excel workbook** plus a **CEO-level deck**.
- **Software Engineering Intern, Syngenta Services Pvt Ltd** Jan 2025 – July 2025
 - Developed, maintained, and improved **React Native** modules for **Smart Agrolite**, leveraging **Redux-Saga**, **Realm DB**, and **Async Storage**.
 - Designed and implemented a **dynamic, reusable NPM package** for the **Plantix** feature; conducted extensive documentation via **JIRA**, **Confluence**, and **README.md**.
 - Collaborated in an **Agile environment**, contributing to code reviews, bug fixes, sprint planning, and feedback sessions.
- **Research Intern, Department of Computer Engineering, VIT Pune** Jun 2024 – Aug 2024
 - Co-developed “**NeoNate Mom**”, a **medical health platform** supporting over **1,000+ mothers** of preterm infants with health tracking, alerts, and discussion forums.
 - Co-authored a research paper, currently **under review at the ACM CHI Conference on Human Factors in Computing Systems** (Tier-1 in Human-Computer Interaction).
- **Software Project Intern, Revogreen Technologies** Sep 2022 – Jan 2023
 - Engineered **Bluetooth-based data communication features and UI** from scratch in the **Smart Shunt mobile app** built using **Flutter**.
 - Managed the entire product flow from **Figma-based UI/UX design** to deployment, completing the project within a tight timeline.

Programming Languages:	Python, C++, Java, C, TypeScript, SQL, Dart, R, JavaScript, HTML/CSS, LaTeX
Frameworks:	React Native, ReactJS, Flutter, Node.js, Express.js, Redux, Spring Boot, Django
Libraries:	TensorFlow, PyTorch, OpenCV, Scikit-learn, NumPy, Pandas, Matplotlib, NLTK
DevOps & Deployment:	Docker, Kubernetes, Jenkins, MLFlow, Git, GitHub, CI/CD Pipelines, Firebase, AWS, GCP
Databases:	PostgreSQL, MySQL, MongoDB, Realm, Firebase Firestore
Tools & Platforms:	Figma, JIRA, Anthropic Claude API, MCP, Claude Code, Claude Cwork, Agent Skills
Core Competencies:	Problem Solving, Leadership, Team Management, Research Communication, Public Speaking, Collaboration, Time Management, Agile/Scrum, Initiative, Documentation
Areas of Interest:	Mobile App Development, Cross-platform Development, AI/ML, Research

- **StackIQ: AI/SaaS Utilization Harness for Claude** May '26– Present
 - Built a harness-level diagnostic for **Claude (Cowork / Claude Code)** auditing AI/SaaS usage: **idle seats, tier mismatches, duplicate tools, orphaned accounts, and shadow IT**.
 - Architected a **5-stage, read-then-act pipeline** — stages 1–4 read-only, stage 5 executes only pre-approved fixes behind a **hard human-approval gate**.
 - Sized every finding in **dollars, seats, or accounts**; shipped as an **Excel workbook** and **CEO-level deck**.
- **SceneIt: AI-based Prompt-Driven Video Editing Tool** Jun '25 – Present
 - Built an **AI-powered video editing platform** allowing users to edit videos via natural language prompts.
 - Automated tasks such as **trimming, transitions, overlays, and effects** through text-to-action parsing.
 - Reduced manual editing time by over **70%** and provided creative suggestions using generative AI.
- **React Native Syngenta Plantix Package** Jan '25 – July '25
 - Pioneered a modular **React Native library** enabling Plantix (AI-powered crop disease identification).
 - Designed dynamic, reusable feature packages supporting cross-app deployment in Syngenta's global apps, including **Cropwise Grower (3M+ users)**.
 - *Technologies: React Native, Redux, Realm DB, NPM, JavaScript.*
- **IEEE App — IEEE VIT Pune Student Branch** Jan '24 – Apr '24
 - Worked as part of a 5-member team to design and deploy a **Flutter app** for event and community engagement.
 - Integrated **QR-based attendance, Firebase backend, and YouTube API** for resources and quizzes.
 - Deployed successfully on the **Google Play Console**; streamlined member interaction and event tracking.
 - *Technologies: Flutter, Firebase, Dart, Google Play Console, YouTube API.*

- **IEEE Student Branch, VIT Pune (2021 – 2024):** Progressed from **Executive Committee Member** to **Project Head**. Contributed as part of the App Team, developing and maintaining multiple projects while mentoring peers in app development. Conducted internal coding sessions and organized hands-on workshops to strengthen technical knowledge within the branch.
- **App Team Leadership:** As Project Head, guided and mentored 35 executive committee members in Flutter, app development, and open-source practices. Structured a workshop-based learning model with weekly tasks, identified top performers, and formed a core app team to build the official IEEE SB mobile application. Supervised two additional industry projects under the team’s portfolio.
- **DevOps Workshop Instructor:** Served as a technical instructor for a large-scale DevOps workshop, delivering hands-on sessions to over 60 participants covering Docker, CI/CD, Kubernetes, and cloud deployment fundamentals.
- **Hacktoberfest Contributor & Mentor (2022 – 2023):** Achieved **Level 4 Contributor** for two consecutive years by making consistent open-source contributions. Later introduced and mentored IEEE members in contributing to open source, helping many achieve their first successful PRs.
- **Student Council, VIT Pune (2023 – 2024):** Served as **Finance Coordinator**, managing event budgets, vendor coordination, and financial documentation for major campus events. Collaborated closely with faculty and management to ensure smooth execution of college-wide initiatives.
- **Certifications:** Earned the **IBM Full Stack Software Development Specialization (Coursera)** — a comprehensive 15-course program covering front-end, back-end, DevOps, and cloud deployment workflows. Additional certifications in Machine Learning, Deep Learning, and Data Analysis using Python.
- **Anthropic Certifications:** Completed 5 Anthropic certifications — **Introduction to Model Context Protocol, Claude with the Anthropic API, Introduction to Agent Skills, Claude Code in Action**, and **AI Fluency: Framework & Foundations**.

2021 – 2025	B.Tech in Computer Engineering , Vishwakarma Institute of Technology (VIT), Pune Relevant Coursework: Data Structures and Algorithms, Operating Systems, Database Management Systems, Artificial Intelligence, Machine Learning, Computer Networks	<i>CGPA: 8.64/10.0</i>
2020 – 2021	Higher Secondary Education (HSC) , Deogiri College, Aurangabad	<i>Percentage: 93.33%</i>
2018 – 2019	Class 10th , Stepping Stones High School, Aurangabad (CBSE)	<i>Percentage: 87.60%</i>
